APPENDIX - BH

MADURAI KAMARAJ UNIVERSITY

(University with Potential for Excellence)

Bachelor of Computer Applications (B.C.A)

Revised Syllabus

(CBCS–Semester Pattern)

(With effect from the Academic Year 2023 onwards)

STRUCTURE OF THE SYLLABUS

Introduction

BCA (Bachelor of Computer Application)

Education is the key to development of any society. Role of higher education is crucial for securing right kind of employment and also to pursue further studies in best available world class institutes elsewhere within and outside India. Quality education in general and higher education in particular deserves high priority to enable the young and future generation of students to acquire skill, training and knowledge in order to enhance their thinking, creativity, comprehension and application abilities and prepare them to compete, succeed and excel globally. Learning Outcomes-based Curriculum Framework (LOCF) which makes it student-centric, interactive and outcome-oriented with well-defined aims, objectives and goals to achieve. LOCF also aims at ensuring uniform education standard and content delivery across the state which will help the students to ensure similar quality of education irrespective of the institute and location.

Computer Application is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. throughout the world in last couple of decades and it has carved out a space for itself like any other disciplines of basic science and engineering. Computer Application is a discipline that spans theory and practice and it requires thinking both in abstract

terms and in concrete terms. Nowadays, practically everyone is a computer user, and many people are even computer programmers. Computer Application can be seen on a higher level, as a science of problem solving and problem solving requires precision, creativity, and careful reasoning. The ever-evolving discipline of computer Application also has strong connections to other disciplines. Many problems in science, engineering, health care, business, and other areas can be solved effectively with computers, but finding a solution requires both computer science expertise and knowledge of the particular application domain. Computer Application has a wide range of specialties. These include Computer Architecture, Software Systems, Graphics, Artificial Intelligence, Computational Science, and Software Engineering. Drawing from a common core of computer science knowledge, each specialty area focuses on specific challenges. Computer Application is practiced by mathematicians, scientists and engineers. Mathematics, the origins of Computer Science, provides reason and logic. Science provides the methodology for learning and refinement. Engineering provides the techniques for building hardware and software.

Programme Outcome, Programme Specific Outcome and Course Outcome

Computer Application is the study of quantity, structure, space and change, focusing on problem solving, application development with wider scope of application in science, engineering, technology, social sciences etc. The key core areas of study in Mathematics include Algebra, Analysis (Real & Complex), Differential Equations, Geometry, and Mechanics.

The Students completing this programme will be able to present Software application clearly and precisely, make abstract ideas precise by formulating them in the Computer languages. Completion of this programme will also enable the learners to join teaching profession, enhance their employability for government jobs, jobs in software industry, banking, insurance and investment sectors, data analyst jobs and jobs in various other public and private enterprises.

| LEARNING OUTCOMES-BASED CURRICULUM FRAMEWORK GUIDELINES BASED REGULATIONS FOR UNDER GRADUATE PROGRAMME | |
|---------------------------------------------------------------------------------------------------------------|---------------------|
| Programme: | B.C.A., |
| Programme Code: | |
| Duration: | 3 years [UG] |

| | |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <p>Programme Outcomes:</p> | <p>PO1: Disciplinary knowledge: Capable of demonstrating comprehensive knowledge and understanding of one or more disciplines that form a part of an undergraduate Programme of study</p> <p>PO2: Communication Skills: Ability to express thoughts and ideas effectively in writing and orally; Communicate with others using appropriate media; confidently share one’s views and express herself/himself; demonstrate the ability to listen carefully, read and write analytically, and present complex information in a clear and concise manner to different groups.</p> <p>PO3: Critical thinking: Capability to apply analytic thought to a body of knowledge; analyse and evaluate evidence, arguments, claims, beliefs on the basis of empirical evidence; identify relevant assumptions or implications; formulate coherent arguments; critically evaluate practices, policies and theories by following scientific approach to knowledge development.</p> <p>PO4: Problem solving: Capacity to extrapolate from what one has learned and apply their competencies to solve different kinds of non-familiar problems, rather than replicate curriculum content knowledge; and apply one’s learning to real life situations.</p> <p>PO5: Analytical reasoning: Ability to evaluate the reliability and relevance of evidence; identify logical flaws and holes in the arguments of others; analyze and synthesize data from a variety of sources; draw valid conclusions and support them with evidence and examples, and addressing opposing viewpoints.</p> <p>PO6: Research-related skills: A sense of inquiry and capability for asking relevant/appropriate questions, problem arising, synthesising and articulating; Ability to recognise cause-and-effect relationships, define problems, formulate hypotheses, test hypotheses, analyse, interpret and draw conclusions from data, establish hypotheses, predict cause-and-effect relationships; ability to plan, execute and report the results of an experiment or investigation</p> <p>PO7: Cooperation/Team work: Ability to work effectively and respectfully with diverse teams; facilitate cooperative or coordinated effort on the part of a group, and act together as a group or a team in the interests of a common cause and work efficiently as a member of a team</p> <p>PO8: Scientific reasoning: Ability to analyse, interpret and draw conclusions from quantitative/qualitative data; and critically evaluate ideas, evidence and experiences from an open-minded and reasoned perspective.</p> <p>PO9: Reflective thinking: Critical sensibility to lived experiences, with self awareness and reflexivity of both self and society.</p> <p>PO10 Information/digital literacy: Capability to use ICT in a variety of learning situations, demonstrate ability to access, evaluate, and use a variety of relevant information sources; and use appropriate software for analysis of data.</p> <p>PO 11 Self-directed learning: Ability to work independently, identify appropriate resources required for a project, and manage a project through to completion.</p> <p>PO 12 Multicultural competence: Possess knowledge of the values and beliefs of multiple cultures and a global perspective; and capability to effectively engage in a multicultural society and interact respectfully with diverse groups.</p> <p>PO 13: Moral and ethical awareness/reasoning: Ability to embrace</p> |
|-----------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|

| | |
|-------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| | <p>moral/ethical values in conducting one’s life, formulate a position/argument about an ethical issue from multiple perspectives, and use ethical practices in all work. Capable of demonstrating the ability to identify ethical issues related to one’s work, avoid unethical behaviour such as fabrication, falsification or misrepresentation of data or committing plagiarism, not adhering to intellectual property rights; appreciating environmental and sustainability issues; and adopting objective, unbiased and truthful actions in all aspects of work.</p> <p>PO 14: Leadership readiness/qualities: Capability for mapping out the tasks of a team or an organization, and setting direction, formulating an inspiring vision, building a team who can help achieve the vision, motivating and inspiring team members to engage with that vision, and using management skills to guide people to the right destination, in a smooth and efficient way.</p> <p>PO 15: Lifelong learning: Ability to acquire knowledge and skills, including „learning how to learn“ , that are necessary for participating in learning activities throughout life, through self-paced and self-directed learning aimed at personal development, meeting economic, social and cultural objectives, and adapting to changing trades and demands of work place through knowledge/skill development/reskilling.</p> |
| Programme Specific Outcomes: | <p>PSO1: To enable students to apply basic microeconomic, macroeconomic and monetary concepts and theories in real life and decision making.</p> <p>PSO 2: To sensitize students to various economic issues related to Development, Growth, International Economics, Sustainable Development and Environment.</p> <p>PSO 3: To familiarize students to the concepts and theories related to Finance, Investments and Modern Marketing.</p> <p>PSO 4: Evaluate various social and economic problems in the society and develop answer to the problems as global citizens.</p> <p>PSO 5: Enhance skills of analytical and critical thinking to analyze effectiveness of economic policies.</p> |

3 – Strong, 2- Medium, 1- Low

Highlights of the Revamped Curriculum:

- Student-centric, meeting the demands of industry & society, incorporating industrial components, hands-on training, skill enhancement modules, industrial project, project with viva-voce, exposure to entrepreneurial skills, training for competitive examinations,

- sustaining the quality of the core components and incorporating application oriented content wherever required.
- The Core subjects include latest developments in the education and scientific front, advanced programming packages allied with the discipline topics, practical training, devising mathematical models and algorithms for providing solutions to industry / real life situations. The curriculum also facilitates peer learning with advanced mathematical topics in the final semester, catering to the needs of stakeholders with research aptitude.
- The General Studies and Mathematics based problem solving skills are included as mandatory components in the 'Training for Competitive Examinations' course at the final semester, a first of its kind.
- The curriculum is designed so as to strengthen the Industry-Academia interface and provide more job opportunities for the students.
- The Industrial Statistics course is newly introduced in the fourth semester, to expose the students to real life problems and train the students on designing a mathematical model to provide solutions to the industrial problems.
- The Internship during the second year vacation will help the students gain valuable work experience, that connects classroom knowledge to real world experience and to narrow down and focus on the career path.
- Project with viva-voce component in the fifth semester enables the student, application of conceptual knowledge to practical situations. The state of art technologies in conducting a Explain in a scientific and systematic way and arriving at a precise solution is ensured. Such innovative provisions of the industrial training, project and internships will give students an edge over the counterparts in the job market.
- State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and inter disciplinary nature are incorporated as Elective courses, covering conventional topics to the latest - Artificial Intelligence.

Value additions in the Revamped Curriculum:

| Semester | Newly introduced Components | Outcome/ Benefits |
|-------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| I | <p>Foundation Course To ease the transition of learning from higher secondary to higher education, providing an overview of the pedagogy of learning Literature and analysing the world through the literary lens gives rise to a new perspective.</p> | <ul style="list-style-type: none"> ➤ Instill confidence among students ➤ Create interest for the subject |
| I,II,III,IV | <p>Skill Enhancement papers (Discipline centric /Generic/Entrepreneurial)</p> | <ul style="list-style-type: none"> ➤ Industry ready graduates ➤ Skilled human resource ➤ Students are equipped with the essential skills to make them employable <hr/> <ul style="list-style-type: none"> ➤ Training on language and communication skills enable the students gain knowledge and exposure in the competitive world. <hr/> <ul style="list-style-type: none"> ➤ Discipline centric skill will improve the Technical know-how of solving real life problems. |

| | | |
|---------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| III,IV,V& VI | Electivepapers | <ul style="list-style-type: none"> ➤ Strengthening the domain knowledge ➤ Introducing the stakeholder to the State-of Art techniques from the streams of multi-disciplinary, cross disciplinary and interdisciplinary nature ➤ Emerging topics in higher education/industry/communication network/health sector etc. are introduced with hands-on-training. |
| IV | ElectivePapers | <ul style="list-style-type: none"> ➤ Exposure to industry molds students into solution providers ➤ Generates Industry ready graduates ➤ Employment opportunities enhanced |
| V Semester | Electivepapers | <ul style="list-style-type: none"> ➤ Self-learning is enhanced ➤ Application of the concept to real situation is conceived resulting in tangible outcome |
| VI Semester | Electivepapers | <ul style="list-style-type: none"> ➤ Enriches the study beyond the course. ➤ Developing a research framework and presenting their independent and intellectual ideas effectively. |
| Extra Credits: For Advanced Learners/Honors degree | | <ul style="list-style-type: none"> ➤ To cater to the needs of peer learners/research aspirants |
| Skills acquired from the Courses | Knowledge, Problem Solving, Analytical ability, Professional Competency, Professional Communication and Transferrable Skill | |

| CC1 | PYTHON PROGRAMMING | | 5 | - | - | - | 5 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | |
| LO1 | To make students understand the concepts of Python programming. | | | | | | | | | |
| LO2 | To apply the OOPs concept in PYTHON programming. | | | | | | | | | |
| LO3 | To impart knowledge on demand and supply concepts | | | | | | | | | |
| LO4 | To make the students learn best practices in PYTHON programming | | | | | | | | | |
| LO5 | To know the costs and profit maximization | | | | | | | | | |
| UNIT | Contents | | | | | | | | | No. of Hours |
| I | Basics of Python Programming: History of Python-Features of Python-Literal-Constants-Variables - Identifiers–Keywords-Built-in Data Types-Output Statements – Input Statements-Comments – Indentation- Operators-Expressions-Type conversions. Python Arrays: Defining and Processing Arrays – Array methods. | | | | | | | | | 15 |
| II | Control Statements: Selection/Conditional Branching statements: if, if-else, nested if and if-elif-else statements. Iterative Statements: while loop, for loop, else suite in loop and nested loops. Jump Statements: break, continue and pass statements. | | | | | | | | | 15 |
| III | Functions: Function Definition – Function Call – Variable Scope and its Lifetime-Return Statement. Function Arguments: Required Arguments, Keyword Arguments, Default Arguments and Variable Length Arguments- Recursion. Python Strings: String operations- Immutable Strings - Built-in String Methods and Functions - String Comparison. Modules: import statement- The Python module – dir() function – Modules and Namespace – Defining our own modules. | | | | | | | | | 15 |
| IV | Lists: Creating a list -Access values in List-Updating values in Lists- Nested lists -Basic list operations-List Methods. Tuples: Creating, Accessing, Updating and Deleting Elements in a tuple – Nested tuples– Difference between lists and tuples. Dictionaries: Creating, Accessing, Updating and Deleting Elements in a Dictionary – Dictionary Functions and Methods - Difference between Lists and Dictionaries. | | | | | | | | | 15 |

| | | |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------|
| V | Python File Handling: Types of files in Python - Opening and Closing files-Reading and Writing files: write() and writelines() methods- append() method – read() and readlines() methods – with keyword – Splitting words – File methods - File Positions- Renaming and deleting files. | 15 |
| TOTAL HOURS | | 75 |
| Course Outcomes | | Programme Outcomes |
| CO | On completion of this course, students will | |
| CO1 | Learn the basics of python, Do simple programs on python, Learn how to use an array. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO2 | Develop program using selection statement, Work with Looping and jump statements, Do programs on Loops and jump statements. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO3 | Concept of function, function arguments, Implementing the concept strings in various application, Significance of Modules, Work with functions, Strings and modules. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO4 | Work with List, tuples and dictionary, Write program using list, tuples and dictionary. | PO1, PO2, PO3, PO4, PO5, PO6 |
| CO5 | Usage of File handlings in python, Concept of reading and writing files, Do programs using files. | PO1, PO2, PO3, PO4, PO5, PO6 |
| Textbooks | | |
| 1 | Reema Thareja, “Python Programming using problem solving approach”, First Edition, 2017, Oxford University Press. | |

| CC2 | PYTHON PROGRAMMING LAB | | - | - | 5 | - | 5 | 40 | 60 | 100 |

Course Objectives:

1. Be able to design and program Python applications.
2. Be able to create loops and decision statements in Python.
3. Be able to work with functions and pass arguments in Python.
4. Be able to build and package Python modules for reusability.
5. Be able to read and write files in Python.

| LAB EXERCISES | | Required Hours |
|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------|-----------------------|
| 1. Program using variables, constants, I/O statements in Python. 2. Program using Operators in Python. 3. Program using Conditional Statements. 4. Program using Loops. 5. Program using Jump Statements. 6. Program using Functions. 7. Program using Recursion. 8. Program using Arrays. 9. Program using Strings. 10. Program using Modules. 11. Program using Lists. 12. Program using Tuples. 13. Program using Dictionaries. 14. Program for File Handling. | | 60 |
| Course Outcomes | | |
| On completion of this course, students will | | |
| CO1 | Demonstrate the understanding of syntax and semantics of | |
| CO2 | Identify the problem and solve using PYTHON programming techniques. | |
| CO3 | Identify suitable programming constructs for problem solving. | |
| CO4 | Analyze various concepts of PYTHON language to solve the problem in an efficient way. | |
| CO5 | Develop a PYTHON program for a given problem and test for its correctness. | |

| EC1 | DIGITAL LOGIC FUNDAMENTALS | | 4 | - | - | - | 3 | 25 | 75 | 100 |
| Learning Objectives | | | | | | | | | | |
| LO1 | Classify various gates, binary codes and illustrate laws and theorem's of Boolean Algebra | | | | | | | | | |
| LO2 | Convert numbers from one radix to another and build logic circuits with optimal design | | | | | | | | | |
| LO3 | Apply binary addition, subtraction 2's complement arithmetic to implement arithmetic circuits | | | | | | | | | |
| LO4 | Assess the functioning of multiplexer, decoder, flip flop, register and memory | | | | | | | | | |
| LO5 | Design a digital circuit using the knowledge acquired from combinational logic, sequential logic, and K-map | | | | | | | | | |
| UNIT | Contents | | | | | | | | | No. of Hours |
| I | Number Systems and Codes: Number System–Base Conversion – Binary Codes – Code Conversion. Digital Logic: Logic Gates – Truth Tables – Universal Gates. | | | | | | | | | 12 |
| II | Boolean Algebra: Laws and Theorems – SOP, POS Methods – Simplification of Boolean Functions – Using Theorems, K-Map, Prime – Implicant Method – Binary Arithmetic: Binary Addition – Subtraction – Various Representations of Binary Numbers–Arithmetic Building Blocks–Adder–Subtractor. | | | | | | | | | 12 |
| III | Combinational Logic: Logic: Multiplexers -16 to 1 Multiplexer-nibble multiplexer Demultiplexers – 1 to 16 Demultiplexer Decoders – 1 of 16 Decoder- BCD- to Decimal Decoder- Encoders- Decimal to BCD encoders –Parity Generators and Checkers. | | | | | | | | | 12 |
| IV | Sequential Logic: RS, JK, D, and T Flip-Flops–Master-Slave Flip Flops. Registers: Shift Registers -Types of Shift Registers. | | | | | | | | | 12 |
| V | Counters: Asynchronous and Synchronous Counters - Ripple, Mod, Up-Down Counters– Ring Counters. Memory: Basic Terms and Ideas –Types of ROMs –Types of RAMs. | | | | | | | | | 12 |
| TOTAL HOURS | | | | | | | | | 60 | |

| Course Objective | | | | | | | | | | | |
| LO1 | Understand the basics of computer systems and its components. | | | | | | | | | | |
| LO2 | Understand and apply the basic concepts of a word processing package. | | | | | | | | | | |
| LO3 | Understand and apply the basic concepts of electronic spreadsheet software. | | | | | | | | | | |
| LO4 | Understand and apply the basic concepts of database management system. | | | | | | | | | | |
| LO5 | Understand and create a presentation using PowerPoint tool. | | | | | | | | | | |
| UNIT | Details | | | | | | | | | | No. of Hours |
| I | Introductory concepts: | | | | | | | | | | 6 |

| | | |
|-----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------|
| | Memory unit– CPU-Input Devices: Key board, Mouse and Scanner. Output devices: Monitor, Printer. Introduction to Operating systems & its features: DOS–UNIX–Windows. Introduction to Programming Languages. | |
| II | Word Processing: Open, Save and close word document; Editing text – tools, formatting, bullets; Spell Checker - Document formatting – Paragraph alignment, indentation, headers and footers, numbering; printing– Preview, options, merge. | 6 |
| III | Spreadsheets: Excel–opening, entering text and data, formatting, navigating; Formulas– entering, handling and copying; Charts–creating, formatting and printing, analysis tables, preparation of financial statements, introduction to data analytics. | 6 |
| IV | Database Concepts: The concept of data base management system; Data field, records, and files, Sorting and indexing data; Searching records. Designing queries, and reports; Linking of data files; Understanding Programming environment in DBMS; Developing menu drive applications in query language (MS–Access). | 6 |
| V | Power point: Introduction to Power point - Features – Understanding slide typecasting & viewing slides – creating slide shows. Applying special object – including objects & pictures – Slidetransition– Animation effects, audio inclusion, timers. | 6 |
| | Total | 30 |

| FC | Structured Programming in C | FC | Y | - | - | - | 2 | 2 | 25 | 75 | 100 |
| Course Objective | | | | | | | | | | | |
| LO1 | To familiarize the students with the Programming basics and the fundamentals of C, Datatypes in C, Mathematical and logical operations. | | | | | | | | | | |
| LO2 | To understand the concept using if statements and loops | | | | | | | | | | |
| LO3 | This unit covers the concept of Arrays | | | | | | | | | | |
| LO4 | This unit covers the concept of Functions | | | | | | | | | | |
| LO5 | To understand the concept of implementing pointers. | | | | | | | | | | |
| UNIT | Details | | | | | | | | No. of Hours | Course Objectives | |
| I | Overview of C: Importance of C, sample C program, C program structure, executing C program. Constants, Variables, and Data Types: Character set, C tokens, keywords and identifiers, constants, variables, data types, declaration of variables, Assigning values to variables--- Assignment statement, declaring a variable as constant, as volatile. Operators and Expression. | | | | | | | | 6 | CO1 | |
| II | Decision Making and Branching: Decision making with If, simple IF, IF ELSE, nested IF ELSE , ELSE IF ladder, switch, GOTO statement. Decision Making and Looping: While, Do-While, For, Jumps in loops. | | | | | | | | 6 | CO2 | |

| | | | |
|------------------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|-----|
| III | Arrays: Declaration and accessing of one & two-dimensional arrays, initializing two-dimensional arrays, multidimensional arrays. | 6 | CO3 |
| IV | Functions: The form of C functions, Return values and types, calling a function, categories of functions, Nested functions, Recursion, functions with arrays, call by value, call by reference, storage classes-character arrays and string functions | 6 | CO4 |
| V | Pointers: definition, declaring and initializing pointers, accessing a variable through address and through pointer, pointer expressions, pointer increments and scale factor, pointers and arrays, pointers and functions, pointers and structures. | 6 | CO5 |
| Total | | 30 | |
| Course Outcomes | | Programme Outcome | |
| CO | On completion of this course, students will | | |
| 1 | Remember the program structure of C with its syntax and semantics | PO1,PO3,PO5 | |
| 2 | Understand the programming principles in C (data types, operators, branching and looping, arrays, functions, structures, pointers and files) | PO2,PO3,PO6,PO7 | |
| 3 | Apply the programming principles learnt in real-time problems | PO3,PO4,PO7 | |
| 4 | Analyze the various methods of solving a problem and choose the best method | PO4,PO5,PO6 | |
| 5 | Code, debug and test the programs with appropriate test cases | PO7,PO8 | |

| CC3 | OBJECT ORIENTED PROGRAMMING CONCEPTS USING C++ | Core | Y | - | - | - | 5 | 5 | 25 | 75 | 100 |
| Course Objective | | | | | | | | | | | |
| LO1 | Describe the procedural and object oriented paradigm with concepts of streams, classes, functions, data and objects | | | | | | | | | | |
| LO2 | Understand dynamic memory management techniques using pointers, constructors, destructors, etc | | | | | | | | | | |
| LO3 | Describe the concept of function overloading, operator overloading, virtual functions and polymorphism | | | | | | | | | | |
| LO4 | Classify inheritance with the understanding of early and late binding, usage of exception handling, generic programming | | | | | | | | | | |
| LO5 | Demonstrate the use of various OOPs concepts with the help of programs | | | | | | | | | | |
| UNIT | Details | | | | | | | | | | No. of Hours |
| I | Introduction to C++ - key concepts of Object-Oriented Programming – Advantages – Object Oriented Languages – I/O in C++ - C++ Declarations. Control Structures : - Decision Making and Statements : If ..else, jump, goto, break, continue, Switch case statements - Loops in | | | | | | | | | | 15 |

| | | |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| | C++ :for, while, do - functions in C++ - inline functions – Function Overloading. | |
| II | Classes and Objects: Declaring Objects – Defining Member Functions – Static Member variables and functions – array of objects –friend functions – Overloading member functions – Bit fields and classes – Constructor and destructor with static members. | 15 |
| III | Operator Overloading: Overloading unary, binary operators – Overloading Friend functions –type conversion – Inheritance: Types of Inheritance – Single, Multilevel, Multiple, Hierarchal,Hybrid, Multi path inheritance – Virtual base Classes – Abstract Classes. | 15 |
| IV | Pointers – Declaration – Pointer to Class , Object – this pointer – Pointers to derived classes andBase classes – Arrays – Characteristics – array of classes – Memory models – new and deleteoperators – dynamic object – Binding, Polymorphism and Virtual Functions. | 15 |
| V | Files – File stream classes – file modes – Sequential Read / Write operations – Binary and ASCIIFiles – Random Access Operation – Templates – Exception Handling - String – Declaring andInitializing string objects – String Attributes – Miscellaneous functions . | 15 |
| Total | | 75 |

| UNIT | Details | | | | | | | No. of Hours | Course Objectives | | |
| I | <p>Introduction: What is Biometrics, History, Types of biometric Traits, General architecture of biometric systems, Basic working of biometric matching, Biometric system error and performance measures, Design of biometric system, Applications of biometrics, Biometrics versus traditional authentication methods.</p> <p>Face Biometrics: Introduction, Background of Face Recognition, Design of Face Recognition System, Neural Network for Face Recognition, Face Detection in Video Sequences, Challenges in Face Biometrics, .7 Face Recognition Methods, Advantages and Disadvantages.</p> | | | | | | | 6 | CO1 | | |
| II | <p>Retina and Iris Biometrics: Introduction, Performance of Biometrics, Design of Retina Biometrics, Design of Iris Recognition System, Iris Segmentation Method , Determination of Iris Region, Determination of Iris Region, Applications of Iris Biometrics, Advantages and Disadvantages</p> <p>Vein and Fingerprint Biometrics: Introduction, Biometrics Using Vein Pattern of Palm, Fingerprint</p> | | | | | | | 6 | CO2 | | |

| | | | |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------|-----|
| | Biometrics, Fingerprint Recognition System, Minutiae Extraction, Fingerprint Indexing, Experimental Results, Advantages and Disadvantages. | | |
| III | <p>Privacy Enhancement Using Biometrics: Introduction, Privacy Concerns Associated with Biometric Deployments, Identity and Privacy, Privacy Concerns, Biometrics with Privacy Enhancement, Comparison of Various Biometrics in Terms of Privacy, Soft Biometrics.</p> <p>Multimodal Biometrics: Introduction to Multimodal Biometrics , Basic Architecture of Multimodal Biometrics, Multimodal Biometrics Using Face and Ear, Characteristics and Advantages of Multimodal Biometrics, Characteristics and Advantages of Multimodal Biometrics.</p> | 6 | CO3 |
| IV | <p>Watermarking Techniques: Introduction, Data Hiding Methods, Basic Framework of Watermarking, Classification of Watermarking, Applications of Watermarking, Attacks on Watermarks, Performance Evaluation, Characteristics of Watermarks, General Watermarking Process, Image Watermarking Techniques, Watermarking Algorithm, Experimental Results, Effect of Attacks on Watermarking Techniques, Attacks on Spatial Domain Watermarking.</p> | 6 | CO4 |
| V | <p>Scope and Future: Scope and Future Market of Biometrics, Biometric Technologies, Applications of Biometrics, Biometrics and Information Technology Infrastructure, Role of Biometrics in Enterprise Security, Role of Biometrics in Border Security, Smart Card Technology and Biometrics, Radio Frequency Identification (RFID) Biometrics, DNA Biometrics, Comparative Study of Various Biometric Techniques.</p> <p>Biometric Standards: Introduction, Standard Development Organizations, Application Programming Interface (API), Information Security and Biometric Standards, Biometric Template Interoperability.</p> | 6 | CO5 |
| Total | | 30 | |
| Course Outcomes | | | |
| Course Outcomes | On completion of this course, students will; | | |
| CO1 | To understand the basic concepts and the functionality of the Biometrics, Face Biometrics, Types, Architecture and Applications. | PO1, PO3, PO6, PO8 | |
| CO2 | To know the concepts Retina and Iris Biometrics and Vein and Fingerprint Biometrics. | PO1,PO2,PO3,PO6 | |
| CO3 | To analyse the Privacy Enhancement and Multimodal Biometrics. | PO3, PO5 | |
| CO4 | To get analyticalidea on Watrmarking Techniques | PO1, PO2, PO3, PO7 | |
| CO5 | To Gain knowledge on Future scope of Biometrics,and Study of various Biometric Techniques. | PO2, PO6, PO7 | |

| | | | | | | | | | CIA | External | Total |
| CC7 | Programming IN JAVA | Core | Y | - | - | - | 5 | 5 | 25 | 75 | 100 |
| Course Objectives | | | | | | | | | | | |
| LO1 | To provide fundamental knowledge of object-oriented programming | | | | | | | | | | |
| LO2 | To equip the student with programming knowledge in Core Java from the basics up. | | | | | | | | | | |

| LO3 | To enable the students to use AWT controls, Event Handling and Swing for GUI. | | |
|------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------|-------------------|
| LO4 | To provide fundamental knowledge of object-oriented programming. | | |
| LO5 | To equip the student with programming knowledge in Core Java from the basics up. | | |
| UNIT | Details | No. of Hours | Course Objectives |
| I | Introduction: Review of Object Oriented concepts – History of Java – Java buzzwords – JVM Architecture – Datatypes - Variables - Scope and life time of variables - arrays - operators – control statements - type conversion and casting - simple java program - constructors - methods - Static block - Static Data – Static Method String and StringBuffer Classes. | 15 | CO1 |
| II | Inheritance: Basic concepts - Types of inheritance - Member access rules - Usage of this and Super key word - Method Overloading - Method overriding - Abstract classes - Dynamic method dispatch - Usage of final keyword. Packages: Definition - Access Protection – Importing Packages. Interfaces: Definition – Implementation – Extending Interfaces. Exception Handling: <i>try – catch - throw - throws – finally</i> – Built-in exceptions - Creating own Exception classes. | 15 | CO2 |
| III | Multithreaded Programming: Thread Class - Runnable interface – Synchronization – Using synchronized methods – Using synchronized statement - Interthread Communication – Deadlock. I/O Streams: Concepts of streams - Stream classes - Byte and Character stream - Reading console Input and Writing Console output - File Handling. | 15 | CO3 |
| IV | AWT Controls: The AWT class hierarchy - user interface components - Labels - Button - Text Components - Check Box - Check Box Group - Choice - List Box - Panels – Scroll Pane - Menu - Scroll Bar. Working with Frame class - Colour - Fonts and layout | 15 | CO4 |

| | | | |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|-----|
| | managers. Event Handling: Events - Event sources - Event Listeners - Event Delegation Model (EDM) - Handling Mouse and Keyboard Events - Adapter classes - Inner classes | | |
| V | Swing: Introduction to Swing - Hierarchy of swing components. Containers - Top level containers - JFrame - JWindow - JDialog - JPanel - JButton - JToggleButton - JCheckBox - JRadioButton - JLabel, JPasswordField - JTextArea - JList - JComboBox - JScrollPane. | 15 | CO5 |
| | Total | 75 | |
| Course Outcomes | | | |
| Course Outcomes | On completion of this course, students will; | | |
| CO1 | Understand the basic Object-oriented concepts. Implement the basic constructs of Core Java. | PO1, PO2, PO6 | |
| CO2 | Implement inheritance, packages, interfaces and exception handling of Core Java. | PO2, PO3, PO8 | |
| CO3 | Implement multi-threading and I/O Streams of Core Java | PO1, PO3, PO7 | |
| CO4 | Implement AWT and Event handling. | PO2, PO6 | |
| CO5 | Use Swing to create GUI. | PO1, PO3, PO8 | |

| LO4 | To enable the students to use String Concepts. | | | | | | | | | | |
| LO5 | To equip the student with programming knowledge in to creat GUI using AWT controls. | | | | | | | | | | |
| UNIT | Details | | | | | | | | | | |
| 1 | Write a Java program that prompts the user for an integer and then prints out all the prime numbers up to that Integer | | | | | | | | | | |
| 2 | Write a Java program to multiply two given matrices. | | | | | | | | | | |
| 3 | Write a Java program that displays the number of characters, lines and words in a text | | | | | | | | | | |
| 4 | Generate random numbers between two given limits using Random class and print messages according to the range of the value generated. | | | | | | | | | | |
| 5 | Write a program to do String Manipulation using CharacterArray and perform the following string operations: a. String length | | | | | | | | | | |

| | | |
|----|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--|
| | <ul style="list-style-type: none"> b. Finding a character at a particular position c. Concatenating two strings | |
| 6 | <p>Write a program to perform the following string operations using String class:</p> <ul style="list-style-type: none"> a. String Concatenation b. Search a substring c. To extract substring from given string | |
| 7 | <p>Write a program to perform string operations using String Buffer class:</p> <ul style="list-style-type: none"> a. Length of a string b. Reverse a string c. Delete a substring from the given string | |
| 8 | <p>Write a java program that implements a multi-thread application that has three threads. First thread generates random integer every 1 second and if the value is even, second thread computes the square of the number and prints. If the value is odd, the third thread will print the value of cube of the number.</p> | |
| 9 | <p>Write a threading program which uses the same method asynchronously to print the numbers 1to10 using Thread1 and to print 90 to100 using Thread2.</p> | |
| 10 | <p>Write a program to demonstrate the use of following exceptions.</p> <ul style="list-style-type: none"> a. Arithmetic Exception b. Number Format Exception c. ArrayIndexOutOfBoundsException d. NegativeArraySizeException | |
| 11 | <p>Write a Java program that reads on file name from the user, then displays information about whether the file exists, whether the file is readable, whether the file is writable, the type of file and the length of the file in bytes</p> | |
| 12 | <p>Write a program to accept a text and change its size and font. Include bold italic options. Use frames and controls.</p> | |
| 13 | <p>Write a Java program that handles all mouse events and shows the event name at the center of the window when a mouse event is fired. (Use adapter classes).</p> | |
| 14 | <p>Write a Java program that works as a simple calculator. Use a grid</p> | |

| | | |
|------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|
| | layout to arrange buttons for the digits and for the +, -,*, % operations. Add a text field to display the result. Handle any possible exceptions like divide by zero. | |
| 15 | Write a Java program that simulates a traffic light. The program lets the user select one of three lights: red, yellow, or green with radio buttons. On selecting a button, an appropriate message with “stop” or “ready” or “go” should appear above the buttons in a selected color. Initially there is no message shown. | |

| CC9 | Operating Systems | Core | Y | - | - | - | 4 | 5 | 25 | 75 | 100 | |
| Course Objective | | | | | | | | | | | | |
| LO1 | Understanding the design of the Operating System | | | | | | | | | | | |
| LO2 | Imparting knowledge on CPU scheduling, Process and Memory Management. | | | | | | | | | | | |
| LO3 | To code specialized programs for managing overall resources and operations of the computer. | | | | | | | | | | | |
| LO4 | To study about the concept of Job and processor scheduling | | | | | | | | | | | |
| LO5 | To learn about the concept of memory organization and multiprogramming | | | | | | | | | | | |
| UNIT | Details | | | | | | | | No. of Hours | Course Objective | | |
| | Introduction: operating system, history (1990s to 2000 and beyond), distributed computing, parallel computation. Process concepts: definition of process, process states-Life cycle of a process, process management- process state transitions, process control block(PCB), process operations, suspend and resume, context switching, Interrupts -Interrupt processing, interrupt classes, Inter process communication-signals, message passing. | | | | | | | | 15 | CO1 | | |
| II | Asynchronous concurrent processes: mutual exclusion- critical section, mutual exclusion primitives, implementing mutual exclusion primitives, Peterson's algorithm, software solutions to the mutual Exclusion Problem-, n-thread mutual exclusion- Lamports Bakery Algorithm. Semaphores – Mutual exclusion with Semaphores, thread synchronization with semaphores, counting semaphores, implementing semaphores. Concurrent programming: monitors, message passing | | | | | | | | 15 | CO2 | | |
| III | Deadlock and indefinite postponement: Resource concepts, four necessary conditions for deadlock, deadlock prevention, deadlock avoidance and | | | | | | | | 15 | CO3 | | |

| | | | |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-----|
| | Dijkstra's Banker's algorithm, deadlock detection, deadlock recovery. | | |
| IV | Job and processor scheduling: scheduling levels, scheduling objectives, scheduling criteria, preemptive vs non-preemptive scheduling, interval timer or interrupting clock, priorities, scheduling algorithms- FIFO scheduling, RR scheduling, quantum size, SJF scheduling, SRT scheduling, HRN scheduling, multilevel feedback queues, Fair share scheduling. | 15 | CO4 |
| V | Real Memory organization and Management:: Memory organization, Memory management, Memory hierarchy, Memory management strategies, contiguous vs non-contiguous memory allocation, single user contiguous memory allocation, fixed partition multiprogramming, variable partition multiprogramming, Memory swapping Virtual Memory organization: virtual memory basic concepts, multilevel storage organization, block mapping, paging basic concepts, segmentation, paging/segmentation systems. Virtual Memory Management: Demand Paging, Page replacement strategies | 15 | CO5 |
| Total | | 75 | |
| Course Outcomes | | Programme Outcomes | |
| CO | On completion of this course, students will | | |
| 1 | Define the fundamentals of OS and identify the concepts relevant to process , process life cycle, Scheduling Algorithms, Deadlock and Memory management | PO1 | |
| 2 | know the critical analysis of process involving various algorithms, an exposure to threads and semaphores | PO1, PO2 | |
| 3 | Have a complete study about Deadlock and its impact over OS. Knowledge of handling Deadlock | PO4, PO6 | |

| | | |
|------------------------|----------------------------------------------------------------------------------------------------------------------|---------------|
| | with respective algorithms and measures to retrieve from deadlock. . | |
| 4 | Have complete knowledge of Scheduling Algorithms and its types. | PO4, PO5, PO6 |
| 5 | understand memory organization and management | PO3, PO8 |
| Text Book | | |
| 1 | H.M. Deitel, Operating Systems, Third Edition, Pearson Education Asia, 2011 | |
| Reference Books | | |

| | | | | | | | | | CIA | External | Total |
| CC10 | ASP .Net Programming | Core | Y | - | - | - | 4 | 5 | 25 | 75 | 100 |
| Course Objective | | | | | | | | | | | |
| LO1 | To identify and understand the goals and objectives of the .NET framework and ASP.NET with C# language. | | | | | | | | | | |
| LO2 | To develop ASP.NET Web application using standard controls. | | | | | | | | | | |
| LO3 | To implement file handling operations. | | | | | | | | | | |
| LO4 | To handles SQL Server Database using ADO.NET. | | | | | | | | | | |
| LO5 | Understand the Grid view control and XML classes. | | | | | | | | | | |

| UNIT | Details | No. of Hours | Course Objective |
|------------------------|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------|------------------|
| I | Overview of .NET framework: Common Language Runtime (CLR), Framework Class Library- C# Fundamentals: Primitive types and Variables – Operators - Conditional statements -Looping statements – Creating and using Objects – Arrays – Stringoperations. | 15 | C1 |
| II | Introduction to ASP.NET - IDE-Languages supported Components -Working with Web Forms – Web form standard controls: Properties and its events – HTML controls -List Controls: Properties and its events. | 15 | C2 |
| III | Rich Controls: Properties and its events – validation controls: Properties and its events– File Stream classes - File Modes – File Share – Reading and Writing to files – Creating, Moving, Copying and Deletingfiles – File uploading. | 15 | C3 |
| IV | ADO.NET Overview – Database Connections – Commands – Data Reader - Data Adapter - Data Sets - Data Controlsand its Properties – DataBinding | 15 | C4 |
| V | Grid View control: Deleting, editing, Sorting and Paging. XML classes – Web form to manipulate XML files - Website Security - Authentication - Authorization – Creating aWeb application. | 15 | C5 |
| Total | | 60 | |
| Course Outcomes | | Programme Outcome | |
| CO | On completion of this course, students will | | |
| 1 | Develop working knowledge of C# programming constructs and the .NET Framework | PO1, PO2, PO6 | |
| 2 | To develop a software to solve real-world problems using ASP.NET | PO2, PO3, PO8 | |
| 3 | To Work On Various Controls Files | PO1, PO3, PO7 | |
| 4 | To create a web application using MicrosoftADO.NET. | PO2, PO6 | |
| 5 | To develop web applications using XML | PO1, PO3, PO8 | |

| Course Objective | | | | | | | | | | | |
| LO1 | To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms. | | | | | | | | | | |
| LO2 | To understood the concepts of data base management system, design simple Database models | | | | | | | | | | |
| LO3 | To learn and understand to write queries using SQL, PL/SQL. | | | | | | | | | | |
| LO4 | To enable the students to learn the designing of data base systems, foundation on the relational model of data and normal forms. | | | | | | | | | | |
| LO5 | To understood the concepts of data base management system, design simple Database models | | | | | | | | | | |
| UNIT | Details | | | | | | No. of Hours | Course Objective | | | |
| | Database Concepts: Database Systems - Data vs Information - Introducing the database -File system - Problems with file system – Database systems. Data models - Importance - Basic Building Blocks - Business rules - Evolution of Data models - Degrees of Data Abstraction | | | | | | 15 | CO1 | | | |
| II | Design Concepts: Relational database model - logical view of data-keys -Integrity rules - relational set operators - data dictionary and the system catalog - relationships -data redundancy revisited -indexes - codd's rules. Entity relationship model - ER diagram | | | | | | 15 | CO2 | | | |
| III | Normalization of Database Tables: Database tables and Normalization – The Need for Normalization –The Normalization Process – Higher level Normal Form. | | | | | | 15 | CO3 | | | |

| | | | |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|-----|
| | Introduction to SQL: Data Definition Commands – Data Manipulation Commands – SELECT Queries – Additional Data Definition Commands – Additional SELECT Query Keywords – Joining Database Tables. | | |
| IV | Advanced SQL: Relational SET Operators: UNION – UNION ALL – INTERSECT – MINUS. SQL Join Operators: Cross Join – Natural Join – Join USING Clause – JOIN ON Clause – Outer Join. Sub Queries and Correlated Queries: WHERE – IN – HAVING – ANY and ALL – FROM. SQL Functions: Date and Time Function – Numeric Function – String Function – Conversion Function | 15 | CO4 |
| V | PL/SQL: A Programming Language: History – Fundamentals – Block Structure – Comments – Data Types – Other Data Types – Variable Declaration – Assignment operation – Arithmetic operators. Control Structures and Embedded SQL: Control Structures – Nested Blocks – SQL in PL/SQL – Data Manipulation – Transaction Control statements. PL/SQL Cursors and Exceptions: Cursors – Implicit Cursors, Explicit Cursors and Attributes – Cursor FOR loops – SELECT...FOR UPDATE – WHERE CURRENT OF clause – Cursor with Parameters – Cursor Variables – Exceptions – Types of Exceptions. | 15 | CO5 |
| Total | | 75 | |
| Course Outcomes | | Programme Outcomes | |
| CO | On completion of this course, students will | | |
| 1 | Understand the various basic concepts of Data Base System. Difference between file system and DBMS and compare various data models. | PO1 | |
| 2 | Define the integrity constraints. Understand the basic concepts of Relational Data Model, Entity- | PO1, PO2 | |

| | | |
|------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------|
| | Relationship Model. | |
| 3 | Design database schema considering normalization and relationships within database. Understand and construct database using Structured Query Language. Attain a good practical skill of managing and retrieving of data using Data Manipulation Language (DML) | PO4, PO6 |
| 4 | Classify the different functions and various join operations and enhance the knowledge of handling multiple tables. | PO4, PO5, PO6 |
| 5 | Learn to design Data base operations and implement using PL/SQL programs. Learn basics of PL/SQL and develop programs using Cursors, Exceptions | PO3, PO8 |

| | | | | | | | | | CIA | External | Total |
| CC14 | DATA ANALYTICS USING R Programming | Core | Y | - | - | - | 4 | 6 | 25 | 75 | 100 |
| Course Objective | | | | | | | | | | | |
| LO1 | To understand the problem solving approaches | | | | | | | | | | |
| LO2 | To learn the basic programming constructs in R Programming | | | | | | | | | | |
| LO3 | To learn the basic programming constructs in R Programming | | | | | | | | | | |
| LO4 | To use R Programming data structures - lists, tuples, and dictionaries. | | | | | | | | | | |
| LO5 | To do input/output with files in R Programming. | | | | | | | | | | |
| UNIT | Details | | | | | | | No. of Hours | Course Objective | | |
| I | Evolution of Big data — Best Practices for Big data Analytics — Big data characteristics — Validating — The Promotion of the Value of Big Data — Big Data Use Cases- Characteristics of Big Data Applications — Perception and Quantification of Value -Understanding Big Data Storage — A General Overview of High-Performance Architecture — HDFS — MapReduce and YARN — Map Reduce Programming Model | | | | | | | 18 | C1 | | |
| II | CONTROL STRUCTURES AND VECTORS -Control structures, functions, scoping rules, dates and times, Introduction to Functions, preview of Some Important R Data Structures, Vectors, Character Strings, Matrices, Lists, Data Frames, Classes Vectors: Generating sequences, Vectors and subscripts, Extracting elements of a vector using subscripts, Working with logical subscripts, Scalars, Vectors, | | | | | | | 18 | C2 | | |

| | | | |
|------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------|----|
| | Arrays, and Matrices, Adding and Deleting Vector Elements, Obtaining the Length of a Vector, Matrices and Arrays as Vectors Vector Arithmetic and Logical Operations, Vector Indexing, Common Vector Operations | | |
| III | LISTS- Lists: Creating Lists, General List Operations, List Indexing Adding and Deleting List Elements, Getting the Size of a List, Extended Example: Text Concordance Accessing List Components and Values Applying Functions to Lists, Data Frames, Creating Data Frames, Accessing Data Frames, Other Matrix-Like Operations | 18 | C3 |
| IV | FACTORS AND TABLES - Factors and Levels, Common Functions Used with Factors, Working with Tables, Matrix/Array-Like Operations on Tables , Extracting a Sub table, Finding the Largest Cells in a Table, Math Functions, Calculating a Probability, Cumulative Sums and Products, Minima and Maxima, Calculus, Functions for Statistical Distributions R PROGRAMMING . | 18 | C4 |
| V | OBJECT-ORIENTED PROGRAMMING S Classes, S Generic Functions, Writing S Classes, Using Inheritance, S Classes, Writing S Classes, Implementing a Generic Function on an S Class, visualization, Simulation, code profiling, Statistical Analysis with R, data manipulation | 18 | C5 |
| | Total | 90 | |
| Course Outcomes | | Programme Outcomes | |
| CO | On completion of this course, students will | | |
| 1 | Work with big data tools and its analysis techniques. | PO1 | |
| 2 | Analyze data by utilizing clustering and classification algorithms. | PO1, PO2 | |

| | | |
|------------------------|---------------------------------------------------------------------------------------------------------------------------------|---------------|
| 3 | Learn and apply different mining algorithms and recommendation systems for large volumes of data. | PO4, PO6 |
| 4 | Perform analytics on data streams. | PO4, PO5, PO6 |
| 5 | Learn NoSQL databases and management. | PO3, PO8 |

Course Objective

| | | |
|---------------|-----------------------------------------------------------------------------------------------------------------------|--------------------------|
| LO1 | To understand the problem solving approaches | |
| LO2 | To learn the basic programming constructs in R Programming | |
| LO3 | To practice various computing strategies for R Programming -based solutions to real world problems | |
| LO4 | To use R Programming data structures - lists, tuples, and dictionaries. | |
| LO5 | To do input/output with files in R Programming. | |
| Sl. No | Details | |
| 1. | Program to convert the given temperature from Fahrenheit to Celsius and vice versa depending upon user's choice. | |
| 2. | Program, to find the area of rectangle, square, circle and triangle by accepting suitable input parameters from user. | |
| 3. | Write a program to find list of even numbers from 1 to n using R-Loops. | |
| 4. | Create a function to print squares of numbers in sequence. | |
| 5. | Write a program to join columns and rows in a data frame using cbind() and rbind() in R. | |
| 6. | Implement different String Manipulation functions in R. | |
| 7. | Implement different data structures in R (Vectors, Lists, Data Frames) | |
| 8 | Write a program to read a csv file and analyze the data in the file in R. | |
| 9 | Create pie chart and bar chart using R. | |
| 10 | 10. Create a data set and do statistical analysis on the data using R. | |
| 11 | Program to find factorial of the given number using recursive function | |
| 12 | Write a R program to count the number of even and odd numbers from array of N numbers. | |
| | Total | |
| | Course Outcomes | Programme Outcome |
| CO | On completion of this course, students will | |
| 1 | Acquire programming skills in core R Programming | PO1,PO4,PO5 |
| 2 | Acquire Object-oriented programming skills | PO1, PO4,PO8 |

| | | |
|------------------------|------------------------------------------------------------------------------------------------------------------------------|-------------|
| | in R Programming. | |
| 3 | Develop the skill of designing graphical-user interfaces (GUI) in R Programming | PO1,PO3,PO6 |
| 4 | Acquire R Programming skills to move into specific branches | PO3,PO4 |
| 5 | | PO1,PO5,PO6 |
